OUR STRENGTH

Integrated Manufacturing Facility
End-to-end in-house setup for better control and quality.

Advanced CNC Machines
High precision and repeatability in every component.

Press & Fabrication Shop
In-house press shop for high accuracy components.

In-house Tool Room
Design, development and maintenance of tools & fixtures.

Precision Welding Shop
Skilled welders and advanced equipment for strong & durable assemblies.

Experienced Engineering Team
Qualified and dedicated team ensuring continuous improvement.

Stringent Quality Control
Strict inspection at every stage to ensure superior quality.

On Time Delivery
Strong planning and efficient processes for timely delivery.

OUR COMMITMENT

We value our **customers** and are committed to delivering precision-engineered solutions that exceed expectations and build lasting partnerships.

PRECISION ENGINEERING

RELIABLE QUALITY

CUSTOMER SATISFACTION

OUR INFRASTRUCTURE

Advanced Facilities. Precision Manufacturing. Proven Excellence.

PRESS SHOP

High-capacity power presses for precision sheet metal forming and fabrication.

MACHINES SHOP

Advanced CNC Turning, CNC Milling, VMC and precision machining capabilities.

LASER CUTTING

High-precision laser cutting for intricate designs and perfect accuracy.

FIBER LASER CUTTING

High-speed fiber laser technology for clean, accurate and efficient cutting.

WELD SHOP

MIG, TIG, Spot Welding and fabrication facilities ensuring robust and durable assemblies.

FABRICATION

In-house fabrication for a wide range of industrial and precision components.

TOOL ROOM

In-house tool design, die maintenance, fixtures, jigs and precision tooling support.

EXPERIENCED & DEDICATED ENGG

Team of qualified and experienced engineers committed to continuous improvement, innovation and customer satisfaction.

OUR FABRICATION EQUIPMENT

Powerful Machines. Precise Results.

BAND SAW CUTTING MACHINE

- ✓ Heavy duty construction for precision cutting
- ✓ Hydraulic vice for clamping
- ✓ Variable speed blade for different materials
- ✓ Ideal for MS, SS, Pipes & Sections

Complete Range of
Fabrication Section
(600 mm cutting and
up to 500 Ampere)

INVERTER WELDING MACHINE

- ✓ IGBT Inverter Technology
- ✓ Stable arc, high duty cycle
- ✓ Energy efficient & portable design
- ✓ Suitable for all types of electrodes

Complete Range of
Fabrication Section
(600 mm cutting and
up to 500 Ampere)

FABRICATION FIXTURE

- ✓ Custom built fixtures for accuracy
- ✓ Robust and durable construction
- ✓ Ensures repeatability and consistency
- ✓ Suitable for welding & assembly operations

Complete Range of
Fabrication Section
(600 mm cutting and
up to 500 Ampere)

OUR STRENGTH

Integrated Manufacturing Facility
End-to-end in-house setup for better control and quality.

Advanced CNC Machines
High precision and repeatability in every component.

Press & Fabrication Shop
In-house press shop for high accuracy components.

In-house Tool Room
Design, development and maintenance of tools & fixtures.

Precision Welding Shop
Skilled welders and advanced equipment for strong & durable assemblies.

Experienced Engineering Team
Qualified and dedicated team ensuring continuous improvement.

Stringent Quality Control
Strict inspection at every stage to ensure superior quality.

Advanced Machinery
Modern machines for higher productivity and accuracy.

Customer Focused Solutions
Customized solutions to meet customer requirements.

On Time Delivery
Strong planning and efficient processes for timely delivery.

**OUR
COMMITMENT**

At **Design Era International**, we are committed to delivering high-quality fabrication solutions with the right equipment, skilled workforce and a focus on continuous improvement.

SATISFACTION**

TOOL ROOM & PRECISION FIXTURES

In-house Design. Precision Built. Performance Assured.

Our in-house Tool Room is equipped with advanced machinery and skilled professionals to design and manufacture high-precision fixtures, gauges, jigs and tools that ensure accuracy, repeatability and productivity across all production processes.

Stringent Quality Control
Strict inspection at every stage to ensure superior quality.

Advanced Machinery
Modern machines for higher productivity and accuracy.

Customer Focused Solutions
Customized solutions to meet customer requirements.

On Time Delivery
Strong planning and efficient processes for timely delivery.

EQUIPMENT LIST – FABRICATION & QUALITY CONTROL

Advanced Equipment. Precise Fabrication. Assured Quality.

EQUIPMENT	CAPACITY / SPECIFICATION	QUANTITY
 Hydro-Pneumatic Bush Fitting M/c	10 Ton	1 Nos.
 Laser Cut Machine 1.5 kVA	1.5 kVA	2 Nos.
 Laser Cut Machine	3 kVA	1 Nos.
 Laser Cut Machine	6 kVA	1 Nos.
 Laser Cut Machine	12 kVA	1 Nos.
 Digital Height Gauges	MITUTOYO – 450 MM, 600 MM	2 Nos.
 Master Instruments	MITUTOYO	1 Set
 Surface Plate	1000 x 1000	1 Nos.

OUR STRENGTH

Integrated Manufacturing Facility
End-to-end in-house setup for better control and quality.
